

Monthly count of the number of Seasoned Equity Offerings (SEOs), also known as Follow Ons, January 1970-December 2015

SEOs are defined as offers including at least some shares being offered by the company. In other words, pure primaries and combination offers are included, but pure secondaries, where existing shareholders are doing all of the selling, are excluded. SEOs are also excluded if they are from utilities (SIC codes of 491 - 494) or are not CRSP-listed within three trading days of the SEO. This excludes ADRs. Note that the sample selection criteria here are different from those used in the annual counts elsewhere on Jay Ritter's website.
