REGISTRATION OPEN FOR THE SECOND EDITION OF

**CHALLENGE BY CINTRA PROGRAM**

**Madrid, 8th June 2015.** - Cintra Infraestructuras S.A., a leading company in the field of road infrastructures, and Fundación Universidad-Empresa have launched the second edition of **Challenge by Cintra**, which will start next November 2015 in three different countries: Spain, Portugal and the United States.

For this second edition, Cintra offers 8 international intern positions for recent graduates in Business Management, Economics, Finance, Statistics, Law, Human Resources, Transportation Engineering or Civil Engineering:

- 4 intern positions for candidates who have finished their studies at a Spanish university. The interns will spend a 6 month period at one of Cintra’s corporate and business areas in Madrid and another six months at one of the international locations in the United States, Canada, Australia, Ireland, United Kingdom or Portugal.

- 3 intern positions for candidates who have finished their studies at a US university. The interns will spend a 6 month period at one of Cintra’s corporate and business areas in Austin (Texas) and another six months at one of the international locations in Spain, Canada, Australia, Ireland, United Kingdom or Portugal.

- 1 intern position for candidates who have finished their studies at a Portuguese university. In this case, the intern will spend a 6 month period at one of Cintra’s corporate and business areas in Madrid and another 6 months in Portugal.

Interns will not only receive a monthly grant and additional financial aid for flights, housing, etc., during the second part of the program but will also be enrolled in the online GAIA Master in Professional Development 4.0. This Master, offered by University of Alcalá, is delivered in English and follows an innovative X-learning methodology.

Applications must be submitted by August 16th, 2015 at [www.fue.es/cintra](http://www.fue.es/cintra).

Good academic profile, good working knowledge of English and Spanish, high interpersonal communication skills, proactive mindset and interest in company sector and activities are required. The selected students will start the internship at Cintra in November 2015.
Candidates will have the chance to gain an international perspective in the year long program and work with internationally diverse colleagues in two different countries. This is what Challenge by Cintra provides recent graduates to become excellent young professionals.

CONTEXT INFORMATION

Cintra Infraestructuras, a Ferrovial subsidiary is one of the leading private developers of road infrastructure in the world in terms of number of projects and investment volume. With a total investment of 20,000 million Euros, Cintra operates in Canada, United States, Spain, Ireland, United Kingdom, Portugal, Greece, Colombia and Australia. Cintra manages 26 concessions, with a total of 2,000 kilometers. These assets include the 407 ETR highway in Canada; NTE, in the U.S., and Ausol in Spain.

Since 1973 the Fundación Universidad-Empresa has addressed the challenges and opportunities arising from the university-business framework, and has worked to enable positive feedback and response between those two spheres of activity. Having its efficacy guaranteed by its permanent contact and cooperation with the public administration at a regional, national and European level, institutional visibility has reached a massive scale due to a Board of Trustees that represents 500,000 companies, 17 universities and over 450,000 undergraduate and graduate students.

A special focus is set on four areas: Education (customized training programmes for institutions, academic orientation for secondary students and management of educational programmes), Career Development (internship programmes for students and graduates, career reorientation for PhDs and researchers, job fairs, job opportunity guide and website, job placements for junior profiles, studies and reports), Entrepreneurship (on-campus workshops, annual seminar for young vocational entrepreneur, national intrauniversity competition), and Innovation (consultancy for SMEs, HR management in RD&I (projects and contracts), workshops for doctoral education and training).
